description

Nonwoven wiper made of viscose and polyester. Wiper for universal applications. It's characterized by high strength and absorbency. Perforated structure makes it perfect to wipe dense masses and creams. It can be used long without the risk of fraying. Ideal for mixtures of oil and water and organic dirt. High efficiency optimize usage of the wiper. An optimal grammage of the wiper, optimizes costs of use.

Food Safety certificate PZH HŻ issued by Polish National Institute of Public Health.
